Office Action Summary

Art Unit: 3661

### **DETAILED ACTION**

This Office action is in response to the application filed by Yoneda et al. on November 22, 1999 for the invention titled "AUTOMATIC GUIDANCE SYSTEM FOR FLIGHT VEHICLE HAVING PARAFOIL AND NAVIGATION APPARATUS FOR THE SYSTEM".

#### ***Priority***

Acknowledgment is made of applicant's claim for foreign priority based on an application 10-332672 filed in Japan on 11/24/98. It is noted, however, that applicant has not filed a certified copy of the Japanese application as required by 35 U.S.C. 119.

#### ***Drawings***

The drawings filed 1/12/2000 have been approved.

#### ***Information Disclosure Statement***

The IDS filed 1/12/2000 has been fully considered by the Examiner, as indicated in the accompanying initialed copy of Applicant's form PTO-1449.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3661

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese patent document 5-185993.

This document has been supplied by Applicant as part of an IDS statement, and is described in Applicant's "Description of the Related Art", wherein it is taught that JP-A 5-185993 discloses the dropping and automatic guidance of parafoil type vehicles, through a descent, to a predetermined landing destination site. Applicant acknowledges that the guidance apparatus of JP-A 5-185993 is used to judge the present traveling direction of such a guided flight vehicle with respect to three dimensional position coordinates, through the use of GPS, and that the descent of the vehicle is controlled with respect thereto. In lines 19-22 of applicant's own specification it is stated that JP-A 5-185993 also corrects its position and altitude even when the influence of wind is exerted upon the flight vehicle, and that its attitude can be quickly corrected.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward Pipala whose telephone number is (703) 305-9785. The examiner can normally be reached on Monday through Thursday from 7:30 to 6:00.
